## CELL PHONE WAITING LOT

Motorists who are coming to Philadelphia International Airport to pick up passengers can now wait in the Cell Phone Waiting Lot located on Airport property. The lot is free, easily accessible from both I-95 and Route 291, features space for 150 vehicles, new lighting for a safe waiting area, easy-to-follow directional signage, and is less than a one-minute drive to the baggage claim areas.

Drivers must wait with their vehicles while waiting in the lot.

**Safety Tip:** Please remember that it is illegal to use a handheld cell phone while driving in Philadelphia. The use of a cell phone while driving in the city is permissible only by using a hands free cell phone.

### Directions to the Cell Phone Waiting Lot

**From I-95 North and South:** Exit at Philadelphia International Airport, enter the Airport on the Arriving Flights roadway and follow the signs to the Cell Phone Waiting Lot.

**From Route 291:** Follow the signs to Philadelphia International Airport, take the Arriving Flights roadway and follow the signs to the Cell Phone Waiting Lot.

## SECURITY SCREENING

Before arriving at the Airport, passengers should ensure they have all necessary documents, including a government-issued photo ID, such as a valid driver's license, passport, military ID or a county, state or federal government agency employee ID. Photo ID is required for passengers 18 and older.

Passengers should arrive at the Airport at least one hour prior to a domestic departure and two hours prior to an international departure. Allow extra time for checking in and security screening during peak travel periods. Passengers must obtain boarding passes prior to entering the security checkpoint. Boarding passes and photo ID should be ready for inspection at the security checkpoint.

Liquids and gels in containers larger than 3 ounces are not permitted through the security checkpoint. Liquids and gels in containers of 3 ounces or less must be placed in a 1 quart size clear sealable plastic bag. Clear plastic bags are limited to one per person and must be presented for inspection at the security checkpoint and placed in a bin on the X-ray conveyor belt. Liquids and gels in containers larger than 3 ounces will be confiscated at the checkpoint. Exceptions are made for baby formula, prescription medication and some other items. More information on prohibited and permitted items in both carry-on and checked baggage can be obtained by visiting the Transportation Security Administration website, [www.tsa.gov](http://www.tsa.gov) or by calling the TSA toll-free at 866-289-9673.

To expedite passage through the checkpoint, remove shoes and outerwear such as coats, jackets, and belts and place in

*(continued on pg. 11)*

## SECURITY SCREENING (continued)

the plastic bin provided at the checkpoint. Place any oversized electronics (laptops, full-size video game consoles, DVD players and video cameras that use cassettes) in a separate bin. iPods and other small electronics can stay in carry-on bags.

As of January 1, 2008, loose lithium batteries are prohibited in checked baggage. Keep batteries and equipment in carry-on bags. Visit [www.tsa.gov/travelers/airtravel/assistant/batteries.shtm](http://www.tsa.gov/travelers/airtravel/assistant/batteries.shtm) for more information on traveling with batteries. Pack undeveloped film in carry-on bags. High speed and specialty film should be hand inspected at the checkpoint. Screening equipment will not affect digital cameras and electronic image storage cards.

Travelers with disabilities and medical conditions should provide advance notice to their airline or travel agent if they require assistance at the airport. TSA can only assist passengers with the screening process. If passengers require a companion or assistant to accompany them through the security checkpoint to their departure gate, check with the airline about obtaining a gate pass for that person before entering the security checkpoint area. Inform the screener about any special equipment or devices and where they are located. This will help the screener during a physical search if one is needed. Make sure all equipment, mobility aids and devices have an identification tag attached. If traveling with a service animal, passengers must assist with the inspection process by controlling the animal while the screener conducts the search. More information on travelers with disabilities, medical conditions, prosthetic devices and braces is available on the website [www.tsa.gov](http://www.tsa.gov).

Checked baggage is subject to hand inspection. The TSA recommends using locks that TSA screeners can open and re-lock instead of breaking the lock. The TSA lists some suggested locks on its website, [www.tsa.gov](http://www.tsa.gov).
