June 1, 2010

Mr. Mark A. Gale, A.A.E.
Chief Executive Officer
Philadelphia International Airport
City of Philadelphia
Division of Aviation
Terminal E
Philadelphia, PA 19153

Dear Mr. Gale:

Philadelphia International Airport
FAA Acceptance of Noise Exposure Maps (Update)

This letter is to notify you that the Federal Aviation Administration (FAA) has evaluated and accepted the Noise Exposure Maps and supporting documentation dated December 28, 2009 for the Philadelphia International Airport. In accordance with 49 U.S.C. Section 47503 (formerly the Aviation Safety and Noise Abatement Act of 1979), as amended, we have determined that:

1. The Existing Conditions (2008) noise contours and supporting documentation meet the requirements for the current Noise Exposure Map as of the date of submission as set forth in Title 14, Code of Federal Regulations (CFR), Part 150, Airport Noise Compatibility Planning, Section 150.21, and are accordingly accepted under this Part.

2. The projected aircraft operations, the Forecast Conditions (2013) noise contours and supporting documentation are accepted as the description of the future conditions as set forth in Part 150, and are accordingly accepted under this Part.

3. The documentation provides sufficient evidence consultation was accomplished in accordance with Section 150.21(b).

FAA’s acceptance of the Noise Exposure Maps is limited to the determination that the maps were developed in accordance with the procedures contained in Appendix A of Part 150. Such acceptance does not constitute approval of your data, information or plans.
The FAA will publish a notice in the Federal Register announcing the acceptance of the Noise Exposure Maps for the Philadelphia International Airport. The FAA’s acceptance of these Noise Exposure Maps under Part 150 in no way approves or endorses a Noise Compatibility Program, potential related federal funding of projects identified in such a program, or any related operating restrictions at the subject airport.

Should any questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on the Noise Exposure Maps, you should note that the FAA will not be involved in any way in determination of relative locations of specific properties with regard to the depicted noise contours, or in interpreting the maps to resolve questions concerning, for example, which properties should be covered by the provision of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA’s acceptance of your Noise Exposure Maps Update. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with you, the airport operator, or with those public agencies and planning agencies with which consultation is required under 49 U.S.C. 47503. The FAA relies on the certification by you under section 150.21 of Part 150, that the statutorily required consultation has been accomplished. (14 C.F.R. 150.5)

Your notice of this determination, and the availability of the Noise Exposure Maps, which when published at least three (3) times in a newspaper of general circulation in the county or counties where the affected properties are located, will satisfy the requirements of 49 U.S.C. 47506 of the Act.

Your attention is called to the requirements of Section 150.21(d) of Part 150, involving the prompt preparation and submission of revisions to these maps, if any actual or proposed changes in the operation of the Philadelphia International Airport might create any substantial, new incompatible land use in any areas depicted on the maps, or if there would be a significant reduction in noise over existing incompatible land uses that is not reflected in either map now on file with FAA.

Thank you for your continued interest in noise compatibility planning.

Sincerely,

Lori K. Paganelli,
Manager
